- ▶ Engineered a dual-provider LLM backend (OpenRouter cloud + local Ollama) with automatic failover, and a risk-tiered permission system (CRITICAL/HIGH/MEDIUM/LOW) for safe command execution
- ▶ Designed a persistent memory layer combining SQLite (conversation history) with ChromaDB (semantic vector search), plus a Textual-based terminal UI with wake-word voice activation

PG Rental Management System

MySQL 8.0

- ▶ Designed a normalized relational database (8 tables, 3NF) covering owners, properties, tenants, leases, rent tracking, and maintenance requests
- ▶ Wrote 1,500+ lines of SQL including 3 views, 2 stored procedures, 3 triggers, and 14 performance-tuned indexes
